Vol. 2, No. 6

TaxLogic provides prompt, professional, personal, one-on-one tax preparation from the comfort of your home. We are competitively priced and offer a lot of additional information on our web site - <http://www.taxlogic.com>. With just 9 weeks left, if you haven't started your tax return, it's not too early to start now. April 15th will be here before you know it.

Over the past 6 years we have improved the site from year to year. We are pleased to announce the following enhancements and improvements.

TaxLogic Additions...

1. If you have a small farm, a wood lot, derive any income from cattle, chickens, lumber or corn you can now enter the information for a Schedule F directly during the TaxLogic interview.
2. Information for in home office deductions can now be entered through TaxLogic on form 8829. If you meet the stringent requirements for maintaining a home office and are entitled to the deduction we can help work you through the maze of requirements and limitations. If you have questions on it please let us know. A photo of your home office will greatly add to the substantiation of the deduction. Here is a link to the instructions for form 8829 <http://www.irs.gov/pub/irs-pdf/i8829.pdf>.
3. Through <http://www.allMyDeductions.com>, you can keep track of your contributions and medical expenses throughout the year. This is a free site that we put up this year as an enhancement to our tax wallet in past years. <http://www.Allmydeductions.com> will allow you to enter all medical bills from credit cards, co pays, prescriptions, cash, checks, bills, etc. You can enter the information at any time and for any year. The other part is charitable contributions. During the year you give clothes to goodwill, cash to the church, checks to non-profits, credit card payments, Telethons and payroll deductions to United Way. Now for the first time you can keep track of all those different payments in one place. <http://www.allmydeductions.com> - at the end of the year you can have a full report of all your charitable giving. The program will keep track of your miles as well those that are deductible for your charitable work. And the best thing is that it is free and part of the TaxLogic advice. In addition, your current email address and password will get you into both sites so no need to remember more passwords and email addresses. Once logged on you can switch between the tax program, charitable giving and medical deductions.

Please try this new service and let us have some feedback as to enhancements and improvements that you would suggest to the web site.

Why use TaxLogic? We've heard this time and time again. Recently we had a client who went through the simple interview process then had second thoughts and went to H&R Block®. We had processed the return and within two hours, sent the client the results. They came back saying they had already filed elsewhere so I was curious and called them. Turns out that in their situation, they paid THREE times what they would have been charged through TaxLogic, got the exact same refund amount and the refund would have been deposited to their bank account the same day as if they had gone through TaxLogic. This is just one good reason to use TaxLogic and a reason that can save you money.

Prior Year Returns...

If you haven't filed your taxes for years prior to 2002, we can help! We have been doing quite a number of prior year returns this year and this information can still be entered through the website once you sign in. There is no extra charge for doing a prior year tax return.

Referral Program...

Don't forget, referring someone gets you a \$25 (NON TAXABLE) referral fee direct deposited into your account -- get 3 referrals and your Federal tax preparation will have been done for free!

Thanks for choosing TaxLogic
